

Integrating Intelligence:

NWN EMP Meets HPE Networking Juniper Mist

Organizations face increasing complexity as they modernize for the AI era. Gaining unified visibility is a challenge for IT leaders dealing with dispersed networks and fragmented data. NWN addresses this with a robust integration between the Experience Management Platform (EMP) and HPE Networking Juniper Mist.

This partnership brings together two leading solutions for a unified view across the IT estate. By combining EMP's patented capabilities with Juniper Mist's AI-native networking, the integration delivers operational excellence and advanced automation.

The Power of Unified Visibility

NWN EMP streamlines complex environments with consolidated dashboards, real-time data, and intelligent automation. Its strength lies in bringing together insights from leading technologies for a unified management experience.

Integrating HPE Networking Juniper Mist into EMP delivers unique advantages for IT decision-makers. Juniper Mist supplies AI-driven insights on user experience and performance. This intelligence integrates into EMP, creating a single ecosystem where data from networking, security, and endpoints converges.

Key integration capabilities:

- **Comprehensive Operational Clarity:** View Mist network health alongside other critical infrastructure metrics in one centralized dashboard
- **Proactive Issue Resolution:** Leverage combined data sets to identify root causes faster and reduce mean time to repair (MTTR)
- **Smarter Automation:** Trigger EMP's intelligent automation workflows based on precise telemetry from Juniper Mist.

Leading Transformation in the AI Era

Static managed services are no longer sufficient. Enterprises now need AI-powered managed services for networking. NWN drives this transformation by embedding Juniper Mist's capabilities, empowering customers to shift from reactive troubleshooting to predictive management. IT teams spend less time on maintenance and more on strategic goals.

Unified Intelligence with EMP and Juniper Mist AI

The NWN Experience Management Platform (EMP) seamlessly integrates with HPE Networking and Juniper Mist AI to deliver unmatched visibility into network performance.

Advanced AI capabilities automate routine management tasks and identify optimization opportunities to ensure critical systems remain secure and resilient.

Organizations can leverage this streamlined approach to lower operational costs and provide a superior digital experience that drives business innovation.

Accelerating Adoption with Network as a Service

NWN accelerates customer modernization with a new Network as a Service (NaaS) offering. Organizations avoid large capital expenses and adopt advanced networking via a flexible, predictable service model. NaaS aligns IT investments with evolving budgets and business goals while maximizing performance.

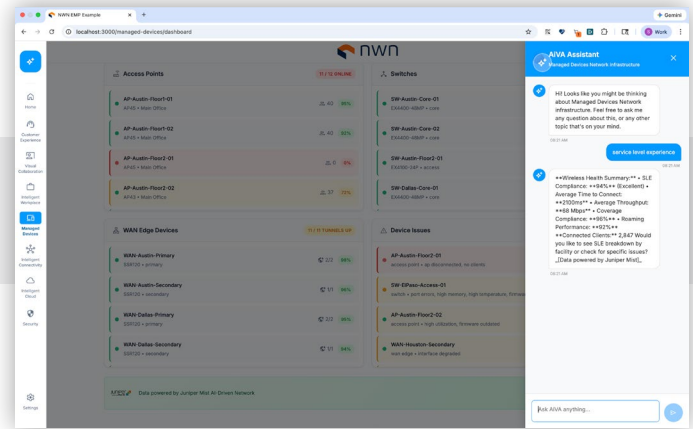

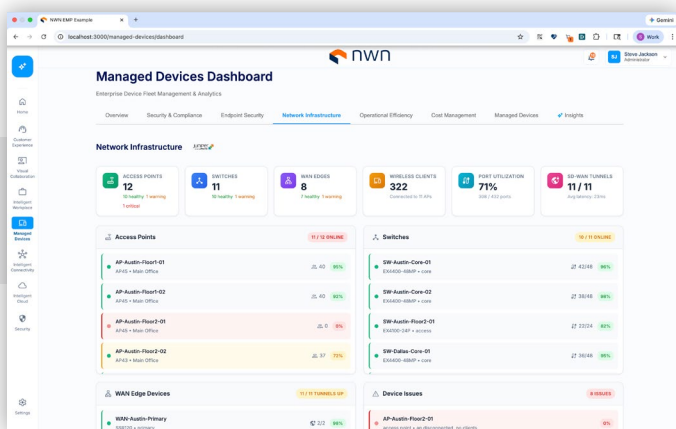

Key Outcomes for Your Business

This integration enables leaders to unlock more value from data, turning infrastructure into a strategic asset that drives growth with NWN's Secure & Resilient by Design approach.

- **Reduce Risk:** Eliminate blind spots with unified visibility across the entire network stack
- **Lower Operational Costs:** Reduce manual intervention through intelligent automation and self-driving network capabilities
- **Enhance Performance:** Ensure consistent and high-quality user experiences through predictive analytics

A Partnership Built on Excellence

NWN partners with HPE Juniper to deliver secure, innovative connectivity. This collaboration drives customer success and has earned NWN the Juniper Partner of the Year award, demonstrating a proven track record of translating technology into business value.

Transform Your Network with Intelligent Insight

Juniper Mist AI combined with EMP enables tech leaders to gain unified, AI-driven visibility and controls that simplify complexity, enhance security, and deliver consistent performance across hybrid environments. Move beyond reactive troubleshooting and focus on strategic initiatives that drive business value. Discover how this integrated solution can modernize network operations for the AI era and deliver measurable results. Contact our team today to schedule a consultation.
